

FASD

& the Neurobehavioral Intervention Model

NEW 6 WEEK IN-DEPTH NEUROBEHAVIORAL PROGRAM

Developed by Diane Malbin, Presented by Cereena Rows FASD consultant CCN and supported by Kim Stewart FASD Coordinator Noojmowin Teg Health Centre. **Who should attend:** Parents/care-givers of an individual with Fetal Alcohol Spectrum Disorder.

Training objectives include:

- Building on people's strengths
- Define FASD as a brain-based, physical disability
- Based on the understanding that behaviours reflect a person's brain functioning
- Identifying that traditional behavior management strategies often don't work as they are based on learning theory which assumes that a person's brain functions a certain way
- Focusing on changing the environment around a person, not changing the person

6 WEEK PROGRAM BEGINNING May 20th

(May 20th, 27th, June 3rd, 10th, 17th, 24th)

Thursdays from 12:00pm - 1:30pm
